

Bio for Kimberly Anness

Name: Kimberly M. Anness

Job Title\Affiliation: GIS Analyst/Programmer at the Division of Geographic Information (DGI)

Past Experience: Kimberly began her career in GIS working at LOJIC and Coulter Mapping Solutions in Louisville, Kentucky, both as a GIS Technician. During her Master's studies she worked at ESRI in Boulder Colorado (The Denver Office) as an intern. Kimberly came into Kentucky State Government as a Geoprocessing Specialist for the Division of Water, in the Natural Resources and Environmental Protection Cabinet (NREPC) during 1997. She moved to the Water Resource Development Commission in 1999 where she became the primary architect of the Kentucky Water Resource Information System (WRIS). Kimberly developed the update routine for the Kentucky Cities boundaries database moved the entire WRIS into ESRI's new GeoDatabase framework, complete with constrained attribute input forms and disconnected editing. Since the move to DGI, Kimberly has created an SDE GeoDatabase that houses all vector datasets (134 layers) published to the Kentucky Geography Network.

Educational Information: Kimberly has a BA in Geography from the University of Louisville (UofL) and has completed numerous levels of training for a wide variety of ESRI GIS Products.

Professional Memberships: None
